## Password Protect Upload Project

## How to enable Password Protection for upload project

You may wish to protect your program from being uploaded from the PLC without the correct authorisation. This can be achieved by applying a password to the project properties which will be requested before the program can be uploaded from the PLC.

- 2. In the window which pops up go to the first tab 'General'
- 3. Tick The 'Password Protected (Upload)' box
- 4. Enter a Password and Verify this Password in the box below then press 'Ok'
- 5. That's it. Now when you try to upload your project from the PLC you will be prompted to enter this password before you can proceed.
